CHOOSE THE RIGHT MOUNTING STYLE

Windshields do more than block wind—they cut fatigue, improve comfort, and keep debris out of the zone. Outlander G3 and G3L models offer two smart mounting styles built to match different ride preferences and functional needs.

HANDLEBAR-MOUNTED

Quick to install, these windshields move with the handlebars for dynamic coverage that tracks with every turn. A flexible, straightforward option for wind protection on the go.

CONSOLE-MOUNTED

They stay fixed to the frame for stable, consistent protection from wind and debris, no matter how you steer. Plus, since they're not mounted on the handlebars, they won't affect handling or control.

Engineered to fit each Can-Am model, BRP drive belts are precisely calibrated to match clutch systems for maximum transfer, zero RPM loss, and unmatched throttle response. Field-tested and race-proven, they're built to take the heat. Literally.

DESIGNED TO PERFORM. PROVEN TO WIN.

From dyno to desert, BRP drive belts are tested in brutal real-world and race conditions.

1

THE TOP COG

adds strength and limits deformation. It's made from a different compound than the lower cog to suit distinct power transfer roles.

2

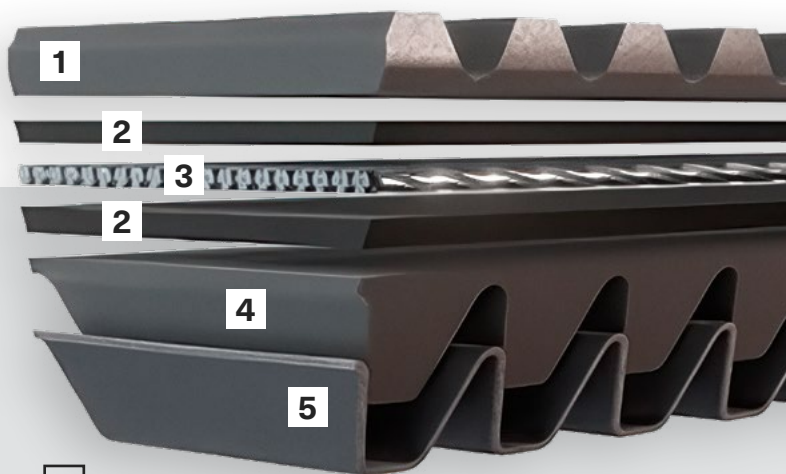

ADHESION LAYERS

promote bonding between the cogged undercord compound and the aramid cord.

3

THE TENSILE CORD

is made with lightweight, high-strength aramid cords, each layer matched to your vehicle's specific power and performance demands.

4

THE UNDERCORD

is a custom mix of natural/synthetic rubbers and high-performance materials, designed for ideal flex and clutch engagement.

5

IMPREGNATED FABRIC

boosts wear resistance for both the belt and your clutches.

Powersport engines are some of the most powerful for their size. This reality creates a lot of pressure and stress on all components, including oils and lubricants. Finding the right balance between lubrication and durability is hard, but that's exactly what you'll find in every XPS bottle. Our chemistry evolved over thousands of testing hours to deliver power and durability like only XPS can.

XPS

OIL THAT GOES THE DISTANCE

XPS OILS

Developed as an integral part of the engine and vehicle, XPS lubricants don't settle for a certification. Always looking for more power and torque is in our DNA. This quest for performance created our need for specifically engineered lubricants.

HOW TO MEASURE

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

1 HEAD	Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.
2 ARM LENGTH	Let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.
3 CHEST/BUST	Measure under your arms, around the fullest part of your chest.
4 WAIST	Measure around your natural waistline, keeping one finger between the tape and body.
5 HIPS	Across the widest part of the seat.
6 INSEAM	Without shoes, from your crotch to the floor.
